

Personal Information:

Name	Laura Michelle Bennett
Address	1862 Cedar Ridge Lane
City	Chattanooga
State	Tennessee
Zip Code	37421
Phone	(423) 555-0186
Email Address	laura.bennett@example.com
Birth Date	10/08/1973 (Age 52)
Blood Type	A Positive (A+)
Organ Donor (Y/N)	Yes

Allergies:

Sulfamethoxazole-trimethoprim — hives.

Chlorhexidine — localized rash and itching at prior dressing site; uses povidone-iodine skin prep instead.

Implants:

Right internal jugular implanted venous access port (PowerPort) — placed 04/28/2026 for chemotherapy.

Medical Conditions:

Left breast invasive ductal carcinoma, clinical stage IIB (cT2N1M0), grade 3, ER-positive/PR-positive/HER2-positive — diagnosed 04/2026; currently receiving neoadjuvant systemic therapy. Mild treatment-related anemia and peripheral neuropathy. Essential hypertension; primary hypothyroidism; GERD.

Medications:

Docetaxel IV every 21 days — neoadjuvant chemotherapy.

Carboplatin IV every 21 days — neoadjuvant chemotherapy.

Trastuzumab IV every 21 days — HER2-targeted therapy.

Pertuzumab IV every 21 days — HER2-targeted therapy.

Pegfilgrastim 6 mg subcutaneous after each chemotherapy cycle — neutropenia prevention.

Dexamethasone 8 mg by mouth twice daily around docetaxel dosing — premedication.

Ondansetron 8 mg by mouth every 8 hours as needed — nausea/vomiting.

Gabapentin 300 mg at bedtime — chemotherapy-related neuropathy.

Lisinopril 10 mg daily — hypertension. Levothyroxine 75 mcg each morning — hypothyroidism.

OTC Medications & Supplements:

Acetaminophen 500 mg, 1–2 tablets every 6 hours as needed for pain or fever (maximum 3,000 mg/day).

Loratadine 10 mg daily for several days after pegfilgrastim if bone pain occurs; Vitamin D3 1,000 IU daily.

Vaccinations:

Influenza 10/06/2025; COVID-19 booster 10/06/2025; Tdap 05/12/2023; Shingrix series completed 2024. Oncology team reviews timing of future vaccines during active treatment.

Recent Procedures:

Diagnostic mammogram and targeted left breast/axillary ultrasound — 04/09/2026: irregular upper-outer left breast mass with suspicious left axillary node.

Ultrasound-guided core biopsy, left breast — 04/14/2026: invasive ductal carcinoma, grade 3; ER 80%, PR 35%, HER2 IHC 3+.

Ultrasound-guided biopsy, left axillary lymph node — 04/20/2026: metastatic carcinoma consistent with breast primary.

CT chest/abdomen/pelvis with contrast — 04/24/2026: left breast mass and regional axillary adenopathy; no distant metastatic disease identified.

Baseline echocardiogram — 04/25/2026: LVEF 63%. Implanted venous access port placed — 04/28/2026.

Neoadjuvant TCHP-type therapy started 05/01/2026; five cycles completed. Sixth cycle planned 08/14/2026, followed by surgical reassessment.

Past Surgeries:

Laparoscopic appendectomy (1998); cesarean section (2001); laparoscopic cholecystectomy (2013). No prior breast surgery.

Family History:

Mother: breast cancer at age 67, alive. Maternal aunt: ovarian cancer at age 58. Father: coronary artery disease and hypertension. Older sister: hypothyroidism. Multigene hereditary breast/ovarian cancer panel reported no pathogenic variant (05/2026).

Doctors:

Monica Reyes, MD — Primary Care, Riverbend Family Medicine — (423) 555-0112.

Daniel K. Mercer, MD — Medical Oncology, Tennessee Valley Cancer Center — (423) 555-0144.

Alyssa Chen, MD — Breast Surgical Oncology, Scenic City Breast Institute — (423) 555-0168.

Priya Raman, MD — Radiation Oncology, Valley Regional Cancer Center — (423) 555-0176.

Insurance:

SummitCare Preferred PPO — Member ID: SCP-DEMO-527419; Group: TN-8841-DEMO; Member Services: (800) 555-0264. Fictional demo coverage only.

Medical Surrogates:

Primary: Michael Bennett (spouse) — (423) 555-0107. Alternate: Rachel Bennett (adult daughter) — (423) 555-0191. Fictional demo health-care surrogate designation names both in this order.

Emergency Contacts:

Michael Bennett (spouse) — (423) 555-0107.

Rachel Bennett (daughter) — (423) 555-0191.

Next of Kin:

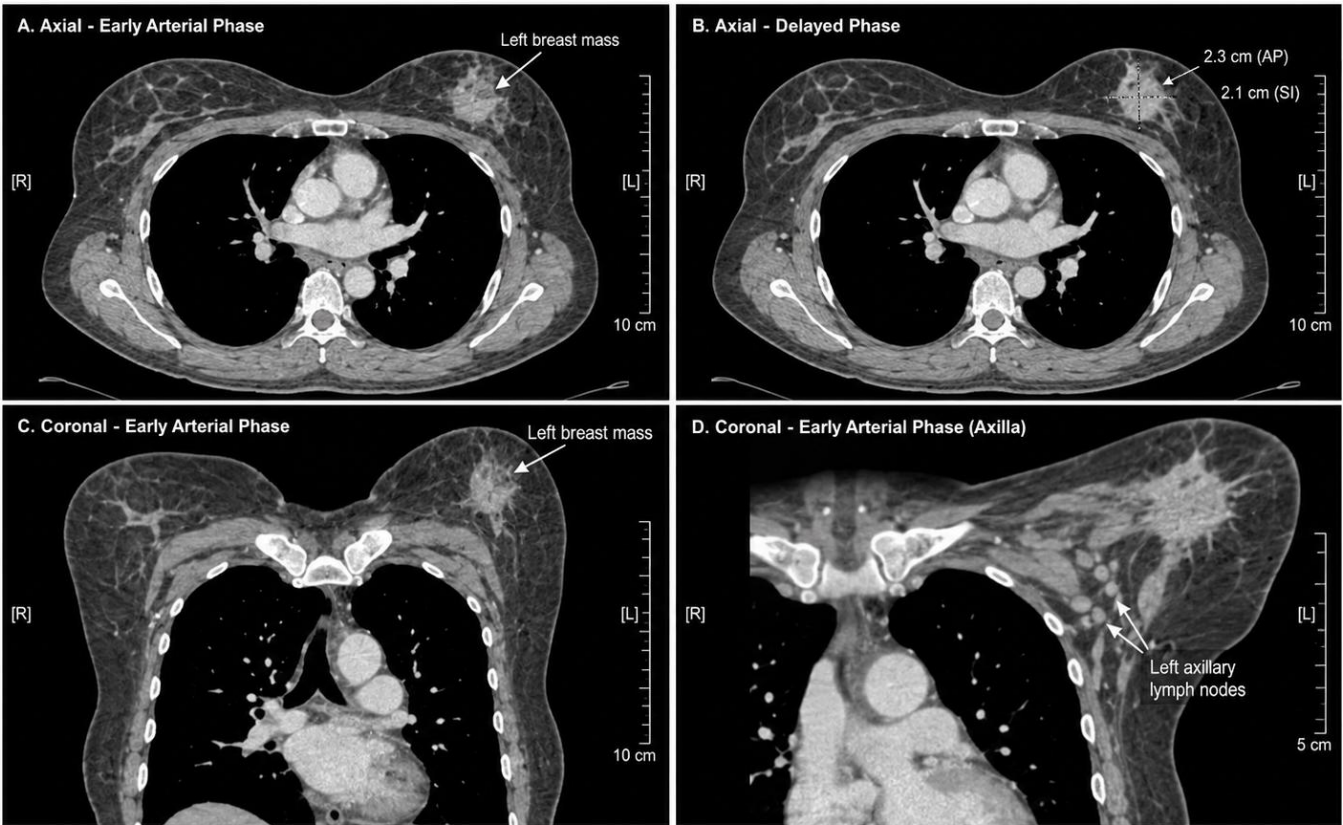

Michael Bennett — spouse — same household as patient — (423) 555-0107.

Diagnostic Imaging:

Study Date: 05/20/2025
Study Time: 10:42 AM

DEMO CT CHEST WITH CONTRAST

Series: 5

FINDINGS: 2.3 x 2.1 cm enhancing mass in the upper outer quadrant of the left breast, suspicious for malignancy.
Several small left axillary lymph nodes measuring up to 1.1 cm in short axis, indeterminate.

RECOMMENDATION: Tissue diagnosis and oncologic consultation.

Images for demonstration purposes only.
Not for diagnostic use.

DEMO CT IMAGE — FICTIONAL / NOT FOR DIAGNOSTIC USE
